Depending upon your time restraints, abilities and budget, we have split our advertising into two simple formats:

Our combination of a customized Applewood Dynamic Vertical Advertisement (DVA) which is designed to catch the eye of a reader and our Applewood Line Item Web Link (LIW) to catch web searching spider technology, ensures customer reader traffic.

Applewood ad's are placed strategically on our web page for maximum visibility that allows readers and customers shopping for your products to easily navigate to your information.
